

Kanopy via Libby App for Android and IOS

Once logged into Kanopy via the Libby App, you can browse curated films or **tap the Search tab** to search for a film.

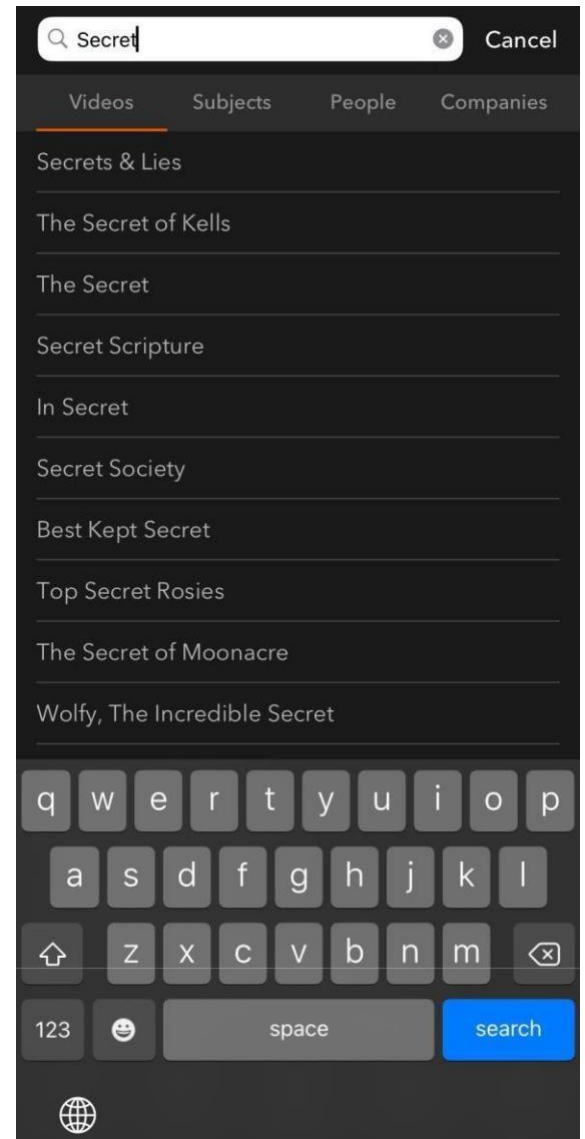

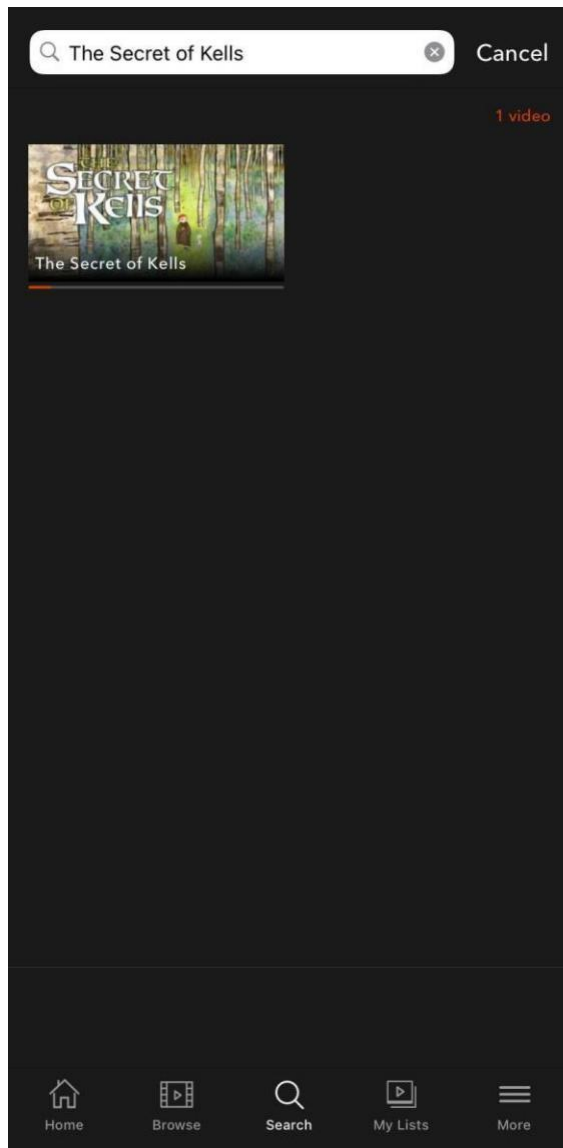

Kanopy allows you to search by Videos, Subjects, People, or Companies.

Select a category and then **enter your search terms**.

Kanopy will populate results as you type. Tap a title...

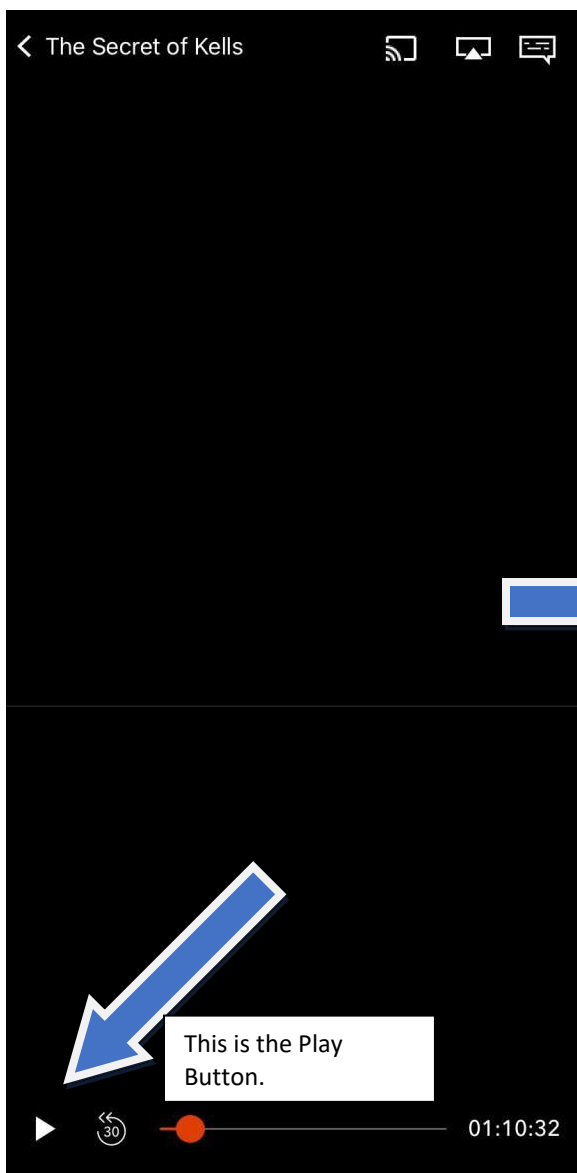

Tap the picture of the title...

And the film's page will open. To save the film for later, **tap + Watchlist**. To watch the film, **tap the play button**.

As the video plays, **tap the screen** to access the interface and then **tap the interface buttons** to pause, play, or rewind the film. And when you're done watching, **tap the back arrow**.

This is the back arrow.

Tap **My Lists** and then tap **Continue Watching** to see your list of unfinished films. Tap **My Watchlist** to find the titles you've saved.

You can also tap **More** to access Kanopy Kids and Settings.

Here you can add parental controls, set video quality, turn on or off cellular data usage and more.
